Objective

Be a part of a team where I can apply my technological skills, contribute effectively to projects, and gain practical experience to grow professionally while supporting the organization's goals.

Technical Skills

- Programming Languages: C++, Python, Dart, Java, PHP
- UI/UX Tools: HTML, CSS, JS, Figma
- Microsoft Office (MS Word, Excel, PowerPoint)
- Design Software: Canva, Adobe Creative Suite (Photoshop, Lightroom, Premier)

Experience

Web System Developer Intern   *January 20,2025 – April 25,2025*
Department of Science and Technology Region VI

- Focused on the front-end redesign of DOST VI's Event Management System for improved user experience.
- Developed and integrated new web features using PHP and CodeIgniter framework.
- Ensured responsive design for cross-device compatibility.
- Designed mobile app background aligned with organizational branding.
- Collaborated with stakeholders to align design and functionality with project goals.

Projects

ZenLens: Image-Based Stress Detection and Tailored Recommendations for Enhanced Student Stress Management
Thesis Project (Figma, React.JS, CSS, Firebase)
- Frontend Developer - Designed and developed an intuitive and responsive user interface for a stress management tool, ensuring seamless user experience and engagement.
- Project Manager - Led the project as Project Manager, overseeing planning, coordination, and execution to ensure timely delivery while aligning team efforts with project goals.

Mood.it: A Mobile Application for Expressing Your Mood
Applications Development and Emerging Technologies Project (Dart, Flutter)
- Frontend Developer - Developed an engaging and responsive user interface for a mobile application, enabling seamless mood expression and interaction for users. **Snek Game**

sSt. Joseph Manpower Services
Brand Identity for a company (Photoshop, Canva)
- Designed a unique and impactful logo, capturing the essence of the company's brand identity.
